

Test automation skills check.

To develop e2e tests that verify registration in the Miro service. All possible positive and negative cases. (only on the page <https://miro.com/signup/>)

Note: Please consider the screen "Check your email" as the trigger of success registration.

- Tests requirements:
 - It would be better to develop tests in Java
 - Tests should be developed using a Selenium WebDriver.
 - The test project should have a clear and detailed README file
